

NUTQUENCH

THE FIELD MANUAL

Maximum Vibration Edition · September 2026 · Community Architecture Update

An MRI-powered meme project built on magnets, memes, superconductivity, and questionable levels of vibration. This document explains what NUTQUENCH is, how it launched, how The Nut House works, what the creator owns, and what the token does not promise.

01 · THE SIGNAL

MRI knowledge. Meme energy.

NUTQUENCH is a Solana meme token and media/community experiment built around MRI culture. The project uses real MRI vocabulary and physics as the raw material for humor: signal, noise, excitation, gradients, superconductivity, artifacts, quenches, re-magnetization, and the strange daily language of the MRI world.

The point is deliberately simple: no fake utility. NUTQUENCH is not presented as equity, a revenue-sharing instrument, staking yield, a claim on a business, or a promise of future profit. Its token value is market-driven and speculative.

The Nut House

THE NUT HOUSE is the entire NUTQUENCH Discord community. The content strategy is MRI-first and meme-token-second: technically grounded MRI humor, interesting facts, mascot-driven content, community interaction, NUTDEX gameplay, and occasional transparent token updates.

Core language

EXCITATION DETECTED	Buying activity.
QUENCH EVENT	Superconductivity has left the chat.
RE-MAGNETIZATION	We bounce back.
ARTIFACT DETECTED	Something is interfering with the signal.
MAXIMUM VIBRATION	The standing operating condition.

02 · INSIDE THE NUT HOUSE

Same community. Different levels of access.

Joining THE NUT HOUSE does not require token ownership. Visitors can read the public onboarding channels, join the Lobby, follow announcements, and use the Help Desk without holding NUTQUENCH.

NUT HOUSE MEMBER

Holding at least **10,000 NUTQUENCH** and completing the official Collab.Land verification grants the **NUT HOUSE MEMBER** Discord role. That role unlocks the **MEMBERS LOUNGE** and the **NUTDEX** experience.

NUTDEX progression

NUTDEX accomplishments - discoveries, captures, set completion, and authored achievements - can earn Career XP. Career XP determines Career Rank. Buying or holding more NUTQUENCH does not purchase Career XP, Career Rank, achievements, or status.

The progression doctrine

10K NUTQUENCH	Opens NUT HOUSE MEMBER access.
NUTDEX accomplishments	Earn Career XP.
Career XP	Climbs Career Rank.
Career Rank	Can unlock access to purchase future merch.
USD	Buys the merch. XP is never spent.

MONEY OPENS DOORS. ACCOMPLISHMENT EARNS STATUS.

03 · TOKEN FACTS

Launch architecture

NUTQUENCH launched on Solana through Pump.fun. The standard launch created a 1,000,000,000 token supply. The creator received no free founder allocation. Instead, the creator purchased 30,000,000 NUTQUENCH (3.00%) through the launch mechanism.

Total supply	1,000,000,000 NUTQUENCH
Decimals	6
Creator launch purchase	30,000,000 NUTQUENCH (3.00%)
Free founder allocation	None
Native founder vesting	None
Mint authority	None / N/A
Freeze authority	None / N/A
Launch venue	Pump.fun on Solana
Initial market mechanism	Pump.fun bonding curve
Graduation	Automatic migration to PumpSwap if threshold is reached

Bonding curve & graduation

Pump.fun describes its launch curve as a constant-product AMM using on-chain reserves. Buys move the quoted price upward and sells move it downward; larger trades have greater price impact. If the platform's graduation threshold is reached, Pump.fun says the bonding curve closes and liquidity migrates automatically and irreversibly to the canonical PumpSwap pool.

Creator economics

The creator has two separate economic interests: the 30 million NUTQUENCH purchased at launch and creator fees generated by eligible Pump.fun trading activity. As of September 9, 2026, Pump.fun lists the creator fee on bonding-curve trades at 0.300%. Pump.fun controls its fee schedule and may change it. Token holders have no contractual claim on creator fees or other NUTQUENCH brand revenue.

Verification

04 • TRANSPARENCY RULES

What the creator can and cannot do

On-chain verification at launch showed no mint authority and no freeze authority. That means the creator cannot use those authorities to mint additional NUTQUENCH or freeze holder token accounts. The creator's 3% position is not natively vested or locked.

Operating principles

- No manufactured market. No wash trading, fake volume, fake holders, or coordinated deception.
- No fake utility. No invented protocol, yield, staking, revenue share, or roadmap simply to make the token sound more sophisticated.
- Disclose creator economics. The creator launch purchase and creator-fee interest are public.
- One canonical mint. The website and @NUTQUENCH are the official public references for the mint address.
- Brand revenue stays separate from token rights. Future merchandise, sponsorship, affiliate, or media revenue does not create token-holder ownership rights.

Security posture

Never provide seed phrases, private keys, recovery codes, or wallet passwords. Unsolicited listing, verification, promotion, airdrop, and support links should be treated as untrusted. A public blockchain wallet is pseudonymous, not anonymous.

Regulatory framing

A February 2025 SEC Division of Corporation Finance staff statement described typical meme coins as assets commonly purchased for entertainment, social interaction, and cultural purposes, often with limited or no functionality and significant speculation. The statement is staff guidance, is not binding law, and does not eliminate fraud or other legal obligations. A contemporaneous SEC Commissioner response emphasized that facts and circumstances still matter. NUTQUENCH therefore avoids making promises about investment returns or dressing the project up as something it is not.

05 • MRI CULTURE

Science is the source material.

NUTQUENCH content can draw from decades of MRI science and technologist culture, but humor should not come at the expense of patient safety. MRI facts used publicly should be checked against authoritative references and qualified when they depend on field strength, scanner vendor, sequence, implant conditions, protocol, or facility policy.

A quench, accurately

In a superconducting MRI magnet, a quench is the loss of superconductivity. Stored energy is converted to heat, cryogen can rapidly boil, and helium gas is intended to be routed through the magnet's venting system. Real-world quench and cryogen safety is serious; NUTQUENCH uses the terminology for branding without trivializing actual safety events.

MRI disclaimer

NUTQUENCH content is for entertainment and general educational discussion. It is not medical advice, MRI safety guidance, a substitute for site policies, manufacturer instructions, an MR Medical Director, or professional training. Do not use meme content to make clinical or safety decisions.

SUPERCONDUCTING UNTIL WE'RE NOT.

06 · RISK & REFERENCES

Risk disclosure

NUTQUENCH is a meme project intended for entertainment and community participation. It does not represent equity, ownership in a company, profit-sharing rights, or a claim on business revenue. Digital assets are highly speculative, can be extremely volatile, and can lose some or all of their value. Nothing in this Field Manual is financial, investment, legal, tax, medical, or MRI safety advice.

Platform dependency

Pump.fun controls its platform mechanics, fee schedule, graduation process, and user interface. Those terms and mechanics can change. Always verify current platform information before relying on a specific fee or process.

Ticker notation

Formal NUTQUENCH materials use **NUTQUENCH** as the token ticker without a dollar-sign prefix. Dollar-sign forms are common social-media shorthand for asset tickers, but they are not a universal cryptocurrency symbol and can visually read as an extra letter in the project name.
